

2019-3-8 Enclosures for Spectrograph

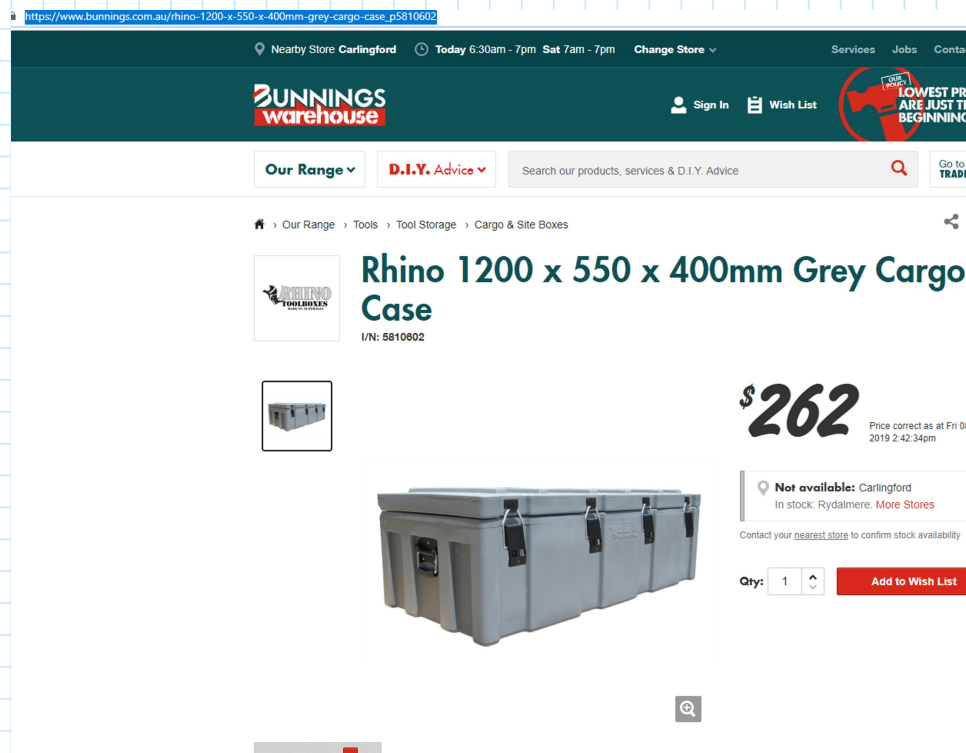

Friday, 8 March 2019 2:42 PM

Need an enclosure, non-vacuum for the spectrograph that will also serve as a shipping container for sending the spectrograph to Hawaii to be used at Subaru

The best solutions look to be either a Pelican case or an extra large insulating cooler.

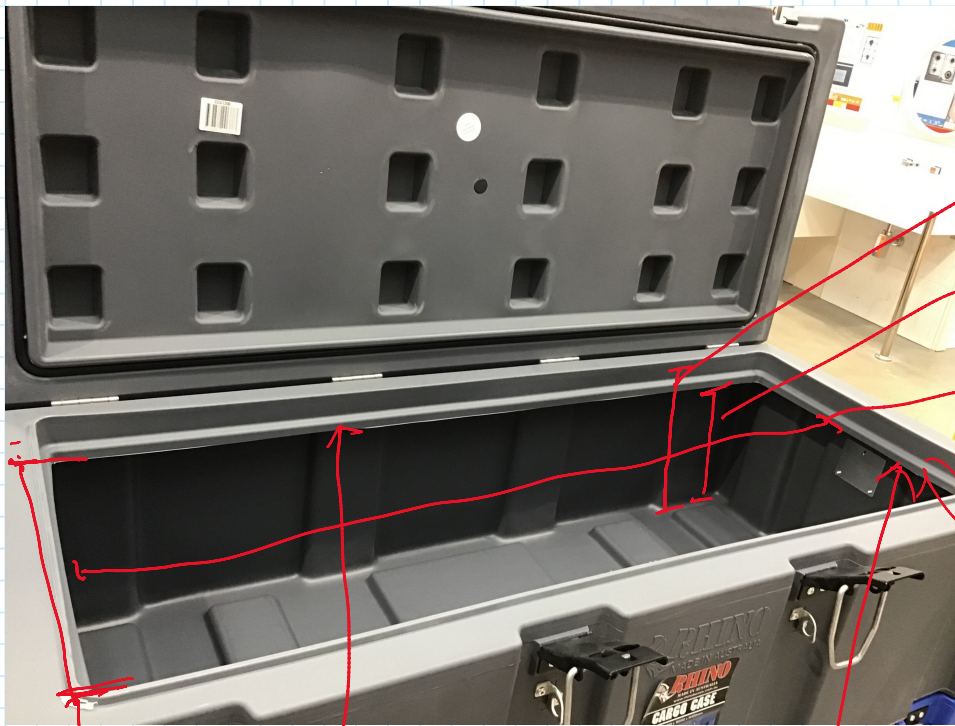

A removable lid would be handy, but not 100% necessary
